

How to send us a question or a document

Anything you need to send us — a question, your bank details, a document or a photo — goes in **"Qs for us"** in your Client Portal. It stays with your file, and it's safer than text message or email. On your phone it's four taps.

1 Open "Qs for us"

At the bottom of the portal, tap **Qs for us** — the third icon. That's the "Questions for us" screen.

2 Tap the + button

Same screen — the round **+** button at the bottom right, just above the menu bar.

3 Choose "Ask a question"

A small window opens. Tap **Ask a question** — use it for text too, not only for questions. **Upload photo** is for taking a picture right away.

4 Write it and tap "Submit"

A short **Subject**, then your text in **Question**. Attach files with **Upload...**. Leave **Team visibility** as it is. Then **Submit**.

Sending a document or a photo? Two ways, both fine: attach it with **Upload...** inside the question (best — your text and the file stay together), or use **Upload photo** in the **+** menu to snap a picture on the spot.

You'll see our answer in the same place. We reply on your question in **Qs for us**, so the whole conversation stays in one thread. Stuck at any step? Just write to us and we'll help.
